

## Company Information

BlueStorm Technologies, an Enterprise-class Solution Provider with customers across the United States, specializes in Systems Integration, Application Development, Collaborative Systems, and Infrastructure Services. Our professionals have experience managing and implementing large-scale projects as well as providing resources to supplement project teams. We have developed strategic partnerships with industry leading companies such as IBM, Microsoft, Dell, Sun, Lenovo, and HP to offer a broad range of software and hardware options.

## Corporate Solutions

Our primary goal is to help organizations large and small meet business demands by utilizing their technology investments to provide flexible and responsive leading-edge systems. Everything you would expect from an Enterprise-class Solution Provider.

We can help you with anything from your IT infrastructure to web presence to custom applications and integration efforts that improve your business processes and increase operational efficiencies. BlueStorm Technologies provides our clients with a comprehensive offering of enterprise class business solutions that has helped companies of all sizes, across all industries increase productivity and profitability while decreasing their Total Cost of Ownership (TCO). By doing this, our clients have become more innovative, flexible and are able to create true differentiation.

Whether you are looking to deploy a corporate portal, extend IBM's collaboration suite, or perhaps you require custom designed business solutions; BlueStorm Technologies' architects, analysts, and project managers have the experience and knowledge to get your project off the ground and ensure success.

## Systems Integration and Application Development

When it's time to develop custom applications it helps to start with a strong development team and a proven methodology. From world-wide systems to departmental applications we have the skills and experience to make your project a success. Our architects and development staff have a reputation for applying knowledge and innovation to building flexible, forward-thinking solutions that utilize the right technology to meet business needs.

## Collaborative Systems and Portals

Do you have team members at multiple locations . . . reduced travel budgets . . . legal requirements . . . limited expertise . . . maybe it's time to look at Collaborative Technologies. With experience implementing products such as Lotus Notes, Domino, Sametime, Quickr, and IBM WebSphere Portal we can help you reduce costs and become more efficient.

Considering a portal? From strategy to implementation we have you covered. With over 8 years of experience delivering enterprise portal solutions we've developed the Enterprise Portal Process Model (EPPM) which covers all phases of portal development and implementation.

## Infrastructure Services

Today's business environments demand an information technology (IT) infrastructure that is efficient, flexible, dependable and compliant while optimizing return on investment. BlueStorm can help you transform your infrastructure into one that you can rely on day-in-and-day-out as well as provide agility, safety, and security. From working with industry changing technologies such as virtualization and automation to providing you with standardization, integration, and consolidation, BlueStorm is your IT Solution Provider.
